

Hot wedge welder

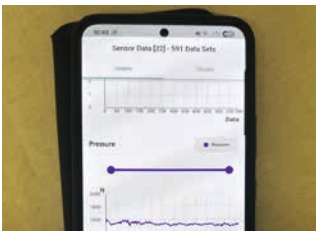

# COMON3 with recording

Easy to us,  
innovative recording system,  
powerful

- reproducible welds through innovative recording system of all welding parameters
- creates a welding report that complies with all current standards and regulations
- recording of all welding data and creating the report via myBAK-app with GPS
- high welding capacity, speed and quality
- changing of wedge made easy because pluggable
- welding range HD-PE: 1,0–3,0 mm
- optional available with kit to use Handtool for pre heat and drying

The hot wedge welding machine features integrated data recording and welding parameter monitoring. The myBAK-app guarantees quick access to data, and reports can be generated with just a few clicks.

| Technical data                              |       |                 |
|---|-------|-----------------|
| Voltage                                     | V     | 230             |
| Frequency                                   | Hz    | 50/60           |
| Power consumption                           | W     | 2100/1700       |
| Temperature                                 | °C    | 20–420          |
| Speed (switchable)                          | m/min | 5/10            |
| Wedge length                                | mm    | 100/80          |
| Welding pressure                            | N     | 1500            |
| Size (l x w x h)                            | mm    | 450 x 280 x 350 |
| Seam dimensions<br>(other sizes on request) | mm    | 15–15–15        |
| Weight                                      | kg    | 18,5            |
| Markings                                    |       | CE              |
